REPURPOS™
VDI · DaaS · Cloud

RepurpOS Software: Free Repurposing Software for Sustainable VDI Computing

RepurpOS Software transforms nearly any device to run a purpose-built operating system for VDI, DaaS, and Cloud.

Breathe new life into existing hardware with VDI, Cloud, and DaaS support with **10ZiG RepurpOS**™. 10ZiG Repurposing Software transforms hardware into a locked down, secure, and integrated virtual endpoint operating system with easy central management, cost-savings, and peace of mind for a controlled, zero trust-based working environment.

- ⊘ Operate with purpose-built Linux OS
- ⊘ Save on immediate device costs
- ⊘ Increase security with thin footprint
- ⊘ Simplified licensing model

- ⊘ Sustain life of existing hardware
- ⊘ Reduce overhead spending
- ⊘ Streamline audio/video communications

Why Repurpose with 10ZiG RepurpOS?

- ⊘ The key differentiator in 10ZiG's repurposing software offering is that it is FREE!
- ⊘ Easily run the software live from any USB stick, install in minutes, and configure without hassle.

- ⊘ Software has earned VMware-Ready Certification status.
- ⊘ Devices can be managed over the internet, and this does not require additional access gateways or licenses.

Minumum Requirements

- ⊘ PC, Laptop, or Thin Client
- ⊘ 2GB RAM Minimum

- ⊘ X86-Based Processor (Intel/AMD)
- ⊘ 4GB Storage Minimum

- ⊘ Intel or AMD-Based Graphics
- ⊘ Ethernet or Wireless Network Interface

POWER SPEED PERFORMANCE

Revive Old PCs, Laptops & 3rd-Party Thin Clients

10ZiG RepurpOS™ Software is designed so that any person can easily implement the software onto a computer, laptop, or even an outdated third-party Thin Client with no hassle. Our software not only transforms an existing device - either PC, Laptop, or Thin Client - to run a purpose-built OS designed for VDI, DaaS and Cloud consumption, it also includes centralized management to deploy and update on its own ensuring that you are never left with complex management issues, juggling outdated brokers, plugins, or security vulnerabilities.

- ✓ Install in minutes
- ✓ Configure without hassle
- ✓ Manage endpoints with ease
- ✓ Enjoy single management pane

- ✓ Rely on US & EMEA based Tech Support Teams
- ✓ Transition to 10ZiG Thin & Zero Clients when ready
- ✓ Test RepurpOS by submitting form at bottom of page

How to Download 10ZiG RepurpOS Sofware:

Run on existing PCs, laptops, and Thin Clients conveniently via USB where it can be easily removed. This option allows easy reverting to and from your existing OS. Also ideal for flexible working scenarios, including hybrid & remote working, allowing you to plug & go to different x86 devices on the move.

Run as a virtual machine on platforms including VMware Workstation, VirtualBox, and more - allowing you to evaluate against an existing environment where you do not have access to any Client hardware during the demo phase.

Alternatively, install locally and run from local storage. Ideal where any existing operating system is unsupported and/or presents security vulnerabilities.
